# The Code Foundation - Logo Guidelines

1. Please note that a prominently visible, equidistant, white margin and background must be maintained as shown in the image below.

2. The color scheme is either as below or an exact inversion, i.e. the blue turns to white and the white to blue. The color code for our shade of blue is: #128fff and for white is #ffffff

3. In case design does not permit a full logo, or to enhance styling you can use the following mini-version of the logo adhering to the guidelines same as above points -

4. Don't -

- Rotate or distort logo
- overlap with other elements
- scale without maintaining aspect ratio
- add or remove elements from the logo
- rearrange logo elements
- only the mini-version of the logo can be embedded within other graphic elements.
